

# Mini Jell-O Aquariums

Kids can get creative with their favorite ocean-themed gummies inside of a Jell-O filled mason jar, complete with those aquarium “rocks” (aka Nerds).

Only 4 ingredients needed and a little bit of patience to make these with kids! They’ll love making them just as much as they’ll love eating them!

## Ingredients

- 3 oz box blue Jell-O (any brand or flavor will do -- I like a lighter color blue)
- 4 half-pint canning jars
- 1/2 cup Nerds candy
- 4 Swedish Fish candies

## Instructions

- 1) Pour Jell-O powder in medium bowl. Boil 3/4 cup water, and pour over the Jell-O. Stir for about 2 minutes, until completely dissolved. Add 3/4 cup cold water. Divide gelatin evenly into 2 small jars and place in the refrigerator for about 4 hours, until firm and fully set.
- 2) Divide the Nerds into the bottom of the two remaining jars. Right before serving, loosen the set Jell-O from jars by running a knife along the inside edges. Place jar upside down over the jar with the candy and give it a tap !it will fall right out and into place!
- 3) Cut two slits in the Jell-O and insert your Swedish Fish. Done!!

Makes 2 mini Jell-O aquariums.
